

# What is Actifile?

Actifile is an endpoint solution which allows organizations to securely and automatically backup data across all company laptops and desktops.

Using Actifile's patented filtering system, files can be found and retrieved instantly.

# The Actifile Advantage

## Simplicity

---

- Easy installation requiring no additional hardware, servers, or maintenance
- Easy to use even for team members who aren't tech savvy

## Data Oriented Backup

---

- Backs up data by file extension instead of folder
- Massive savings on storage costs

## File Discovery

---

- Automatically analyzes and filters data through unique algorithm
- Nearly instant retrieval of any business file
- Easy navigation of all business documents across the organization

## Disaster Recovery

---

- Prevents knowledge loss and data leakage
- Easy recovery of data on lost or broken devices

## Additional Benefits

### Security

---

- Secures data on a cloud-based server with leading double-layered encryption
- Helps your organization meet compliance standards by providing automatic notifications of potential breaches

### Transparency

---

- Allows management real-time access to all documents team members are working on
- Lets management set different levels of permissions for document access
